The project dedicated to the development of sustainable and renewable energy sources is Green Web Solutions. This portal makes it extremely user-friendly and seamless for anyone looking to purchase renewable energy while maintaining a level of user awareness and education on our platform. An important component of our project is Greenie, an intelligent bot that aims to help guide the user throughout the process through answers to the users' questions. Additionally, we provide specific calculators to tell how many solar panels a person would require for commercial and agricultural use so that one can easily shift to clean energy solutions according to specific needs.
